1. The following is an examiner's statement of reasons for allowance: the prior art of record fails to teach or fairly suggest the allowable features recited in the allowed claims. In particular, Takeshita et al. (USP 6,545,546) shows a clock generator (figure 1, PD, CP, VCO) receiving a none return to zero (NRZ) input data with different duty ratio instead of a clock generator providing a double clock having a frequency that is twice that of a received reference clock as called for in claims 1, 8 and 16. Kuduo (USP 6,337,976) and Syoji (USP 6,466,086) shows a phase locked loop as a clock generator for receiving a reference clock signal. However, the prior art references fails to teach or fairly suggest a recovery circuit for recovering a first clock and a second clock from the double clock in accordance with the alignment signal, wherein the first and second clocks having substantially a 90 degree phase difference as called for in claims 1, 8 and 16. Therefore, claims 1-20 are presently allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Tuan T. Lam whose telephone number is 571-272-1744. The examiner can normally be reached on Monday to Friday (7:30 am to 6:00pm).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, TIMOTHY P CALLAHAN can be reached on 571-272-1740. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
